

A Quick Fehti Guide

Refer to the Fehti Guide List (FGL), the keyboard is mapped to the most common consonants and vowels. The FehteMartolammeRegular font is created to print from Left-to-Right. I created a Right-to-Left font, but I could not successfully use it StarOffice, MS Word, and some others as I thought I could.

If you are using the font to type Left-to-Right, just type away.

For example, type the word bate: b - a - t - e ; you see on the screen: 

Or, type the word wiñevë: w - i - N - e - v - E ; you see on the screen: 

To type in block format, set word processor to "right alignment" in the writing area. Using the FGL, type out the sentence, " The father presents *a few* gifts to his two daughters. ":

T'balbamö an'nâ d'kinwupa añê |

Type the first word, t - ' [home] - b - a161 [end]][enter]

 b - a [home] - m - O [end]][enter]

...the second word, , [home] - ~ - a [end]][enter]

 n - ` [home] - | - a163 [end]][enter]

... the third word, , [home] - d - ' [end]][enter]

{to create the next column, move cursor to the top line to the left-most position, then add two spaces, [home] key, and type the next column. REPEAT at each line and for the next columns as needed till the block is complete. Then repeat for each block until the page is full. Then, repeat for each page, until the document is complete.}

... to continue, k - a176 [home] - w - u [back arrow (4x)][down arrow]

 p - a [home] - , [back arrow (4x)][down arrow]

... the last word, | - a [home] - N - a171 [back arrow (4x)][down arrow]

 . [home]

To type Right-to-Left, set word processor to "right alignment" in the writing area. Using the FGL, type out the sentence, " The wine tastes sweet. ":

Yeldê mírsë heste |

Type the first word, y - a178 [home]

 d - a171 [home]

 < [home]

... the second word, m - a183 [home]

 s - E [home]

 < [home]

... the third word, h - e [home]

 F - e [home]

 > [home]

Note: the a#### is ACSII code or u#### is the Unicode number
